***Election/Restrictions***

**1. Restriction to one of the following inventions is required under 35 U.S.C. 121:**

- I. Claims 1-14, 23-36, 45-49 are drawn to a broadcast apparatus, classified in Class 725, subclass 143.
- II. Claims 15-20 and 37-42 are drawn a separation and chasing apparatus, classified in class 725, subclass 135.
- III. Claims 21-22 and 43-44 are drawn toward Internet mail, classified in Class 725, subclass 109.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as vehicle navigation. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a gap filler for detecting the area ID code from among the received broadcast data. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as navigation of a vehicle. See MPEP § 806.05(d).

Art Unit: 2614

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

**2. In addition, the Applicants are also required elect a single species (SP) and a single subspecies (SUB) from whichever of the above group they elect for group I, II, or III.**

This groups contains claims directed to the following patentably distinct species of the claimed invention:

- a) (SP 1) Figure 1 [first embodiment];
  - b) (SP 2) Figures 2 and 10 [second embodiment];
  - c) (SP 3) Figure 3 [third embodiment];
  - d) (SP 4) Figures 4 and 10 [fourth embodiment];
  - e) (*SUB 1*) *Figures 7* [fifth embodiment];
  - f) (*SUB 1*) *Figure 8 and 9* [sixth embodiment];
-

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. William Frommer on July 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

NOTE: Mr. William Frommer requested that a formal restriction be sent out for examination of the client.

Applicant is reminded that **upon the cancellation of claims to a non-elected invention, the inventorship must be amended** in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

A shortened statutory period for response to this action is set to expire **1(one) months and (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C. 133, MPEP 710.03, 710.02(b)).
